These Prices (deduced upon the supposition that the dividends on the different Stocks are all payable at the same time) must be subject to some variation in favour of those Stocks upon which the Dividends soonest become due: for instance, a person making a purchase in September, had better buy into the Consols at 82½ than into the New Fours at 110, because the Dividends on the former Stock become due in October, while those on the latter will not become due until the January following.—Nor must it be forgotten, that the possibility of a Reduction of Interest in some of these Securities, and of the paying off of others, considerably affect their Prices in the Market.

The following Table, constructed upon philosophical considerations of the attraction of the Sun and Moon, in their several positions respecting the earth, and confirmed by experience of many years actual observations, will in very few instances be found to fail.

THE TWO FOLLOWING OBSERVATIONS ARE FROM THE INGENIOUS DR. KIRWAN.

1. When there has been no particular storm about the time of the Spring equinox (March 21),—if a storm arise from the east on or before that day, or if a storm from any point of the compass arise near a week after the equinox, then, in either of these cases, the succeeding summer is generally DRY, four times in five.
2. But if a storm arise from the S. W. or W. S. W. on or just before the Spring equinox, then the Summer following is generally WET, five times in six.
